

Partners & logos

Below you find information regarding logos and partners that are used in this website.

Tiki trading: The team of experienced breeders at Tikitradings has been gathering landrace genetics from around the world since the early 1980's. This enables Tikitradings Research Lab to create the very best and rarest marijuana strains. Tikitradings has won many international prizes for the high quality and stability of its products and is a recognised world leader in the production of top quality seeds.

Mastercard: Today, our company continues to drive the evolution of payments by promoting new, safer, and more convenient ways to pay, accelerating the displacement of cash and checks, delivering increased value to all of our constituents, and advancing commerce in established and emerging markets worldwide.

PayPal is the faster, safer way to pay and get paid online. The service allows people to send money without sharing financial information, with the flexibility to pay using their account balances, bank accounts, credit cards or promotional financing. PayPal is an eBay (Nasdaq:EBAY) company and is made up of three leading online payment services: the PayPal global payment service, the Payflow Gateway and Bill Me Later.

Visa card: Visa connects consumers, merchants and financial institutions around the world with products and services that make payments more convenient and more secure. Products & services: Fast, secure, easy and everywhere, Visa payment products and services have reshaped how the world does business. Innovation: Visa's commitment to innovation keeps us at the forefront of our industry.

iDEAL: An Internet payment method in the Netherlands, based on online banking. Introduced in 2005, this payment method allows customers to buy securely on the Internet using direct online transfers from their bank account. iDEAL is owned by the Dutch organization Currence, which also owns PIN and Chipknip. The participating banks in iDEAL are: ABN AMRO, ASN Bank, Friesland Bank, ING Bank, Rabobank, RegioBank, SNS Bank, Triodos Bank and Van Lanschot.

Youtube: Founded in February 2005, YouTube allows billions of people to discover, watch and share originally-created videos. YouTube provides a forum for people to connect, inform, and inspire others across the globe and acts as a distribution platform for original content creators and advertisers large and small. See our company timeline for more information on our company history.

Twitter is a real-time information network that connects you to the latest stories, ideas, opinions and news about what you find interesting. Simply find the accounts you find most compelling and follow the conversations. At the heart of Twitter are small bursts of information called Tweets. Each Tweet is 140 characters long, but don't let the small size fool you, you can discover a lot in a little space. You can see photos, videos and conversations directly in Tweets to get the whole story at a glance, and all in one place.

HTML5 is a language for structuring and presenting content for the World Wide Web, and is a core technology of the Internet originally proposed by Opera Software. It is the fifth revision of the HTML standard (created in 1990 and standardized as HTML4 as of 1997) and as of March 2012 is still under development. Its core aims have been to improve the language with support for the latest multimedia while keeping it easily readable by humans and consistently understood by computers and devices (web browsers, parsers, etc.).

Facebook's mission is to give people the power to share and make the world more open and connected. Millions of people use Facebook everyday to keep up with friends, upload an unlimited number of photos, share links and videos, and learn more about the people they meet.
